The world of technology is an ever changing landscape. Sometimes it can be hard to keep up with all the new developments. We have put this newsletter together to help keep you updated on what's happening in the world of networking.

Our goal is to help you find the best solution to your networking challenges. With the rapid pace that everything changes you might miss that one thing that will bring calm to your system. Hopefully we can help to keep you caught up with the best the industry has to offer.

Sincerely,

Zenetra Sales  
Zenetra Corporation

### 802.11ac Migration: Picking Up Steam In 2014

This year will see more enterprises investing in 802.11ac products as they develop plans to migrate to the new wireless standard.

Industry experts believe 2014 will start to see an increase in sales of Wi-Fi equipment based on the new 802.11ac standard as enterprises face pressure to support more wireless devices and bandwidth-hungry applications on the network.

### Will SDN Lead to a New Type of Router?

Network hardware, even the lowly router, will have to change its behavior if it is to adequately support the virtual data center.

Much of the forward thinking regarding SDN focuses on how it will enable entirely new network architectures on the virtual/logical layer. But all that software...
